THE DORENFEST CHINA HEALTHCARE GROUP REACHES IMPORTANT AGREEMENTS WITH SEVERAL CHINESE GOVERNMENT AGENCIES

Chicago, Illinois, August 13, 2007 – The Dorenfest China Healthcare Group announced today that agreements have been reached with the Beijing, Chongqing, and Zhejiang Provincial Health Bureaus to host invitational conferences for hospital presidents. These invitational conferences on “Using Information Technology to Improve Hospital Work Processes and Management Systems” are scheduled to be presented as follows:

- Beijing, August 25, 2007
- Chongqing, August 28, 2007
- Hangzhou, August 30, 2007

A distinguished faculty of global experts will participate in this program, including:

- Richard Granger, Director General of I.T. for the NHS in England
- Andre Greyling, CIO of the Hong Kong Hospital Authority
- Wei-Tih Cheng, former CIO of Aetna and Memorial Sloan Kettering Cancer Hospital in the U.S.
- Sheldon I. Dorenfest, President of The Dorenfest Group and The Dorenfest China Healthcare Group

This conference will focus on the historical experience and lessons learned in the global use of I.T. in hospitals. It will also compare the current status of hospital I.T. around the world to China. The program will help Chinese hospital presidents to better use I.T. to improve work processes, management systems and services to patients in China.

The conference outline is as follows:

1. Overview of the global healthcare industry and its success and failure in hospital I.T. development. It will summarize H.I.T. current status and future development trends
2. Global hospital successful case studies
3. Overview of H.I.T. status in China and results to date
4. Describe the approach that hospitals in China should take in order to avoid poor results from investment in H.I.T.

5. Describe the steps that hospitals in China should take to better use information technology to implement digital hospitals and regional health networks.

Sheldon I. Dorenfest, President of The Dorenfest Group and The Dorenfest China Healthcare Group, said, “It is a great honor to be selected to conduct these important education programs in China at this significant moment in history. The H.I.T. market in China is in its infancy. While the U.S. market has gone through four generations of I.T. in its hospitals, China is entering the second generation of hospital I.T. use. China’s ambitious goals are requiring the country to look at the rest of the world’s experience in H.I.T. use in order to learn how to do more of what the rest of the world has done right and less of what the rest of the world has done wrong as China makes larger investments in information technology in health.” The audience for these conferences will be composed of over 100 hospital presidents, vice presidents, and CIOs in each of the cities where the conferences will be held. “The Dorenfest Group is excited to be part of the China healthcare improvement goals that are now in the early stages of being implemented in China,” said Mr. Dorenfest. “It is quite an honor to be selected to provide this education.”

About The Dorenfest China Healthcare Group

The Dorenfest China Healthcare Group was formed in 2006 to offer a variety of investment and consulting services to the healthcare industry in China. Based in Shanghai, The Dorenfest China Healthcare Group invests its skill, technology, and capital in well defined projects to help China improve its healthcare system.
